About Us

Empowering Students Through Hybrid Learning Excellence

At LearnSphere, we believe that every student deserves access to structured, high-quality Math and Science education — anytime, anywhere.

That's why we've built a hybrid learning platform that combines the best of both worlds:

- ? Self-paced online courses for learning on the go
- ? In-person tuition classes for hands-on guidance

Our Story

LearnSphere was founded by an NTU PhD researcher and experienced tutor who saw a problem: students weren't failing due to lack of effort, but due to a lack of flexible, structured, and clear learning.

What started as a passion project has grown into a **smart hybrid tuition platform**, giving students the power to learn **anytime, anywhere**, or step into a **physical learning space** when they need in-person support.

Our Mission

To make Singapore Math & Science learning more accessible, more effective, and more empowering — whether from the comfort of home or a classroom.

What Makes Us Different

Traditional Tuition

- ? Fixed schedules
- ? No video replays
- ? Generic worksheets
- ? One-size-fits-all instruction

LearnSphere

- ? Online or physical classes
- ? Unlimited replays and downloads
- ? MOE-aligned practice
- ? Personalized learning path

Our Values

- ? **Clarity** – We explain complex topics step-by-step
- ? **Accessibility** – Learn online or on-site at your pace
- ? **Rigour** – MOE-aligned, exam-ready resources
- ? **Support** – We're here to help students succeed, not just pass

Join LearnSphere Today

Whether you're looking for flexible online lessons, structured in-person classes, or a blended experience — LearnSphere is here for you.
